What the agent noticed

62% of new value comes from annual price-uplift clauses in 2021–22 contracts. They share one signature: rate plans migrated to the new billing system in Nov 2024 lost their escalation schedules.

41 more contracts match that signature. They're queued for tonight's run, so the root cause is fixed once, not 41 times.

Brightwater Retail renews in 74 days and is high churn risk. Consider bundling its back-bill into the renewal rather than invoicing now.

Halcyon Credit Union MSA-2021-0418 P1 Confidence 98% Awaiting your review

WHAT THE AGENT FOUND

MSA §7.2 requires a price increase every January 1 equal to US CPI-U (September to September), capped at 4%. The rate plan was migrated to the new billing system on 2024-11-03 without its escalation schedule, so per-transaction pricing has stayed at the 2024 rate for 20 months. Amendments 1 and 2 do not modify §7.2.

1 · CONTRACT Human-verified

"...Fees shall increase on each January 1 by the percentage change in CPI-U for the twelve months ending the prior September, not to exceed four percent (4%)."

§7.2 · page 14 · signed 2021-04-18 · [Open in contract](#)

2 · BILLING Mismatch

ARTICLE 7 — FEES AND PAYMENT

7.1 Fees. Customer shall pay the Fees set out in Schedule A for each Transaction processed through the Services, together with the monthly Platform Fee.

7.2 Annual Adjustment. Fees shall increase on each January 1 by the percentage change in CPI-U for the twelve months ending the prior September, not to exceed four percent (4%).

7.3 Minimum Commitment. Where an Order Form specifies a Minimum Monthly Commitment, Provider shall invoice any shortfall in the month following.

7.4 Invoicing. Provider shall invoice monthly in arrears. Invoices are payable within thirty (30) days of receipt.

12.4 Billing Corrections. Provider may invoice amounts omitted in error for up to twenty-four (24) months after the service period.

Contracts, opportunities and billing meet in Snowflake

Snowflake is the system of record for intelligence: documents, terms, expected charges, findings, evidence. Dynamics and Oracle stay the systems of record for transactions. Agents read everything through one canonical model and never write to the source systems in release 1.

One model, four sources, two possible billing systems

Rule packs and agents read only these tables. Each source maps in through its own views, so adding E360 or moving a business unit from Dynamics to Oracle billing changes an adapter, not the rules. [key](#) · [→](#) [reference](#)
